How to Set a virtual background in zoom

Applies to Zoom calling platform in both **web and mobile** versions

Users want to customize their background in calls

Users want to enhance their background or are not comfortable with the actual background coming in the calls. To fix this, Users will need an option to enhance their background through the software now.

Solutions: For PC version

1. Navigate to the settings option once logged in to your zoom account
2. Choose the background option from the settings menu
3. As a User, you should now be able to see all the available background options and also an additional option to import your own pictures or themes
4. Once you choose the background of your choice, you can confirm if it's reflecting by navigating to the video section of your settings menu
5. If you can see your background here, it implies that you have successfully set up your new and custom virtual background
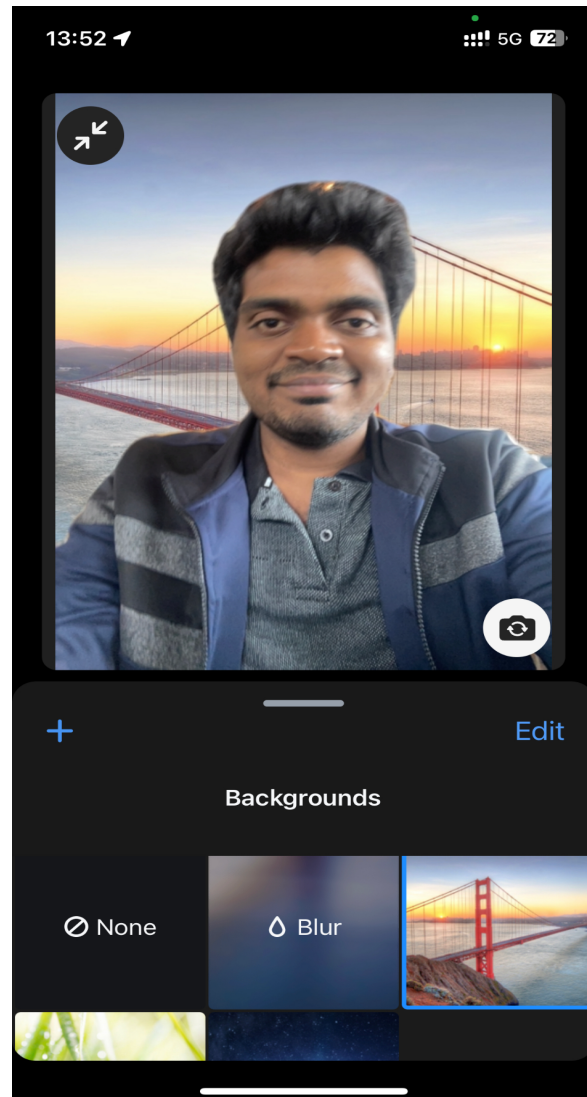

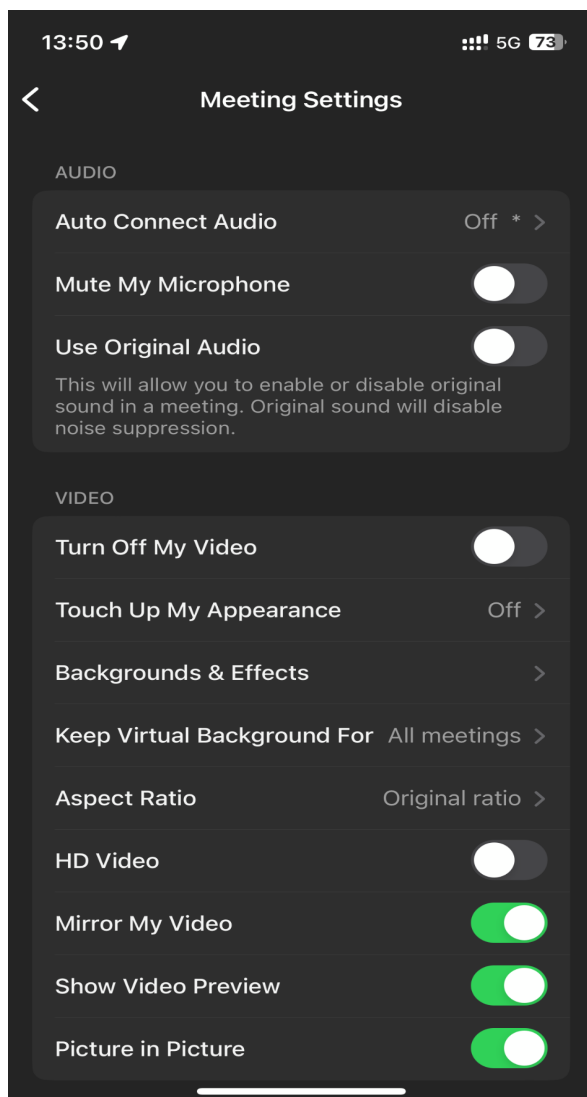

Note: The same steps can also be followed while you are in-call to get the custom background. **Settings -> Background -> Select the background**

For Mobile App, the steps are as follows:

1. Once you are logged into your registered account successfully, click on "more" at the bottom right of your screen to check out options other than main menu
2. Go to Meetings, Click on Backgrounds & Effects, Choose the background of your choice.
3. You can get a visual confirmation of the same background by starting a meeting or when you join your next meeting.

Note: The same steps can also be followed while you are in-call to get the custom background by clicking more option and then navigating to **Background & Effects**
